

Plastic Milk

You will need:

- Two cups of milk
- 8 teaspoons of white vinegar
- A bowl
- A strainer

You will need adult assistance for this science activity.

Instructions:

- Heat the milk unless it's hot. Make sure not to boil it.
- Pour the milk carefully into the bowl.
- Add vinegar to the milk and stir for a minute.
- Pour the milk through the strainer into the sink.
- Keep back the lumpy blobs in the strainer.
- When the blobs cool down, rinse them off under tap water while holding them together all the while.
- Mold it into a rough shape and your plastic milk will be ready!
