

Genetics Quiz

Tick the right answers.

(Find the answers on the next page.)

- The chromosomes for gender contain sex-linked traits.
A – False
B – True
C – Not completely true
- Which of the following is not a type of genetic mutation?
A – Deletion
B – Chemical
C – Insertion
- Which of the following makes up all living creatures and comes in strands?
A – RMA
B – DNA
C – DDT
- Identical twins always belong to the same sex.
A – True
B – False
C – Sometimes
- One of these is not a nitrogen base for DNA.
A – Cytosine
B – Guanine
C – Bromine
- Genetic traits are passed down from generation to generation.
A – False
B – True
C – Occasionally
- The genes of an organism are physically expressed as
A – Mutations
B – Genotype
C – Phenotype
- The mistakes that occur when DNA is copied are known as
A – Crossover
B – Mutations
C – Selections
- The color of your eyes, hair and skin are known as physical traits.
A – True
B – False
C – Not exactly
- The steps of the ladder of DNA are formed by a hydrogen bond.
A – True
B – False
C – Not completely true
